

A Study of Structured Conversion

A. Researcher

August 21, 2026

Abstract

We examine whether typography can recover document structure lost in PDF.

1 Introduction

Portable documents discard semantic structure¹. Recovering it requires inference from visual signals.

2 Method

We apply a modal font-size analysis and cluster larger sizes into headings.

3 Results

Accuracy improves substantially on structured corpora².

Method	F1
Baseline	0.61
Proposed	0.88

4 Conclusion

Inference from typography is a viable path to editable output.

¹This is a footnote about structure.

²A second footnote.
